

## **FEATURES DESCRIPTIONS**

### **Call Waiting**

While talking on the phone call waiting alerts you with a tone (beep) to another incoming call. You can put your current caller on hold, take the second call, and even toggle from one call to another.

### **Call Forwarding**

Program your phone to forward all your calls to any one number at a time, for example your cellular phone.

### **Speed Calling**

Save time dialing your most frequently called numbers. With call speed calling, the calls you make the most are completed with a one or two-digit code.

### **Wake Up Service**

Program your phone to ring at the time you would like to get up the next day.

### **Three Way Calling**

If you like to talk to more than one friend at a time use three way calling to have two parties on.

### **Call # & Name Display**

Know who is calling before you say hello. Call number and name display lets you see the telephone number and name of the person calling before you answer so you can choose which calls to answer.

### **Repeat Dialing**

Get through to busy numbers as soon as they are free. If you call someone and their line is busy, dial \*66 and your phone will ring when the party you had called is no longer on their line.

### **Call Return**

If you could not get to the phone in time, you can still find out who called. Return the call by dialing \*69.

### **Call Screen**

You can program your telephone to reject calls from any number you place on your rejection list. All other calls will ring through as usual.

### **Home Intercom**

Use your phone to talk to someone in another part of the house, or barn, wherever there is an extension. A special ring lets you know it's an intercom call.

### **Distinctive Ring**

An additional phone number is assigned to your telephone line. Keep the main number for Mom & Dad and the second number for the kids. You can also program your fax machine to pick up on the second number. The telephone rings differently for each number so that you know whom the call is for before it is answered. It will tie up the main line when using second number.

### **Voice Mail**

This feature answers your phone and takes a message. If you are on the phone or not you get a signal that a message is waiting. Plus you can retrieve your messages wherever you are. This system also works during a power outage.

### **Non-Published #**

Your name is not published in the directory and your name and number do not appear on call display sets.
